

Advance Scrubber Parts

Imagine how tiresome it will be to tidy up your own home right after having a big party, with no assistance from cleaning equipment. In the past, the time upholstery and carpets had the dust beat out of them by hand; cleaning cloths, brushes and brooms were the best cleaning materials during that time.

P.A. Fisker, the founder of Nilfisk-Advance, was an electrical engineer who loved working with electrical motors. Founding the business in the year 1906, he began to make motors to drive drills, fans, machine tools and coffee grinders. Mr. Fisker's vision from the beginning was to have a worldwide company advertising products worldwide.

The Nilfisk C1 was a remarkable breakthrough for the cleaning trade. This ground breaking vacuum cleaner, invented by Mr. Fisker, weighed only 17.5 kilos and could be operated by a single individual. This creation came in a time where numerous cleaning equipment were huge and required at least 4 operators, thus, the Nilfisk C1 transformed everything and developed the way we clean forever. The brain behind these very first cleaning machines remains unparalleled. Cleaning machines offer a brilliant solution to an existing problem; things get dirty and need to be cleaned frequently, without too much effort.

Slowly but progressively, Nilfisk-Advance developed through the years. During the 1980s, this development truly happened the time the company became a part of the NKT Group. Their new owners' determination and focus made Nilfisk-Advance take a huge leap ahead within the industry, aiming to be among the biggest global players in the market of professional cleaning machines. Nilfisk-Advance is presently found in all parts of the globe by steadily acquiring numerous small companies in order to grow their product portfolio and presence in new markets. They are proud to provide various cleaning solutions to fit each requirement.
